RE: API Spec 5L 46th Edition - New Effective Date

Please be advised that the 46th Edition of API Specification 5L, *Line Pipe*, has a new effective date.

- The NEW Effective Date of this Edition is May 1, 2019

Effective May 1, 2019 Manufacturers of Line Pipe Plain End at PSL 2 will have the option to include Annex N to their Monogram License for applications requiring longitudinal plastic strain capacity.

Your facility should ensure that revisions to the specification are incorporated into your quality management system and that affected personnel are trained on any new requirements and are competent to perform the required activities. This should be completed prior to the specification's effective date and your subsequent audit.

A webinar has been created to provide highlights on the differences between the 45th and 46th editions. [Register now](#) to gain access to the video.

The licensed or applicant organization is required to maintain at least one copy of the most current edition of the English language version of the API Product Specification(s) under which it is licensed or seeking licensure. Purchase API publications in the [API Monogram Web Store](#).

Thank you for your continued dedication and support in maintaining the highest quality and product standards throughout the oil and gas industry.

Together, we can [Power Past Impossible!](#)

Sincerely,

Sharon Bowie
